

EBU6307

Visual Computing

- Coursework Report Submission -

Semester 2, 25/26

Muhammad Salman Haleem

Overview

- **Friday, 22 May 2026, 23:59 PM (UK time)**
 - Sharp deadline, **no late submission**
- **Report**
 - Your own results, your own discussion
- **Codes**
 - Outputs should be reproducible in ebu6307 virtual environment.
 - TAs will run your code and see the results

```
python ex1a.py
python ex1b.py
python ex2a.py
python ex2b.py
python ex2c.py
python ex2d.py
python ex2e.py
python ex2f.py
python ex3a.py
python ex3b.py
python ex3c.py
python ex4.py
```

Guideline (1/3)

- Submit 1) your report and 2) zip file to the QMplus.

- QMplus submission example:

- EBU6307_SALMAN_HALEEM_1711XXXXX.pdf
- EBU6307_SALMAN_HALEEM_1711XXXXX.zip

- The zip file will contain the following folders:

```
EBU6307_FIRSTNAME_FAMILYNAME_QMSTUDNETNUMBER
├── input
├── results
└── codes
```

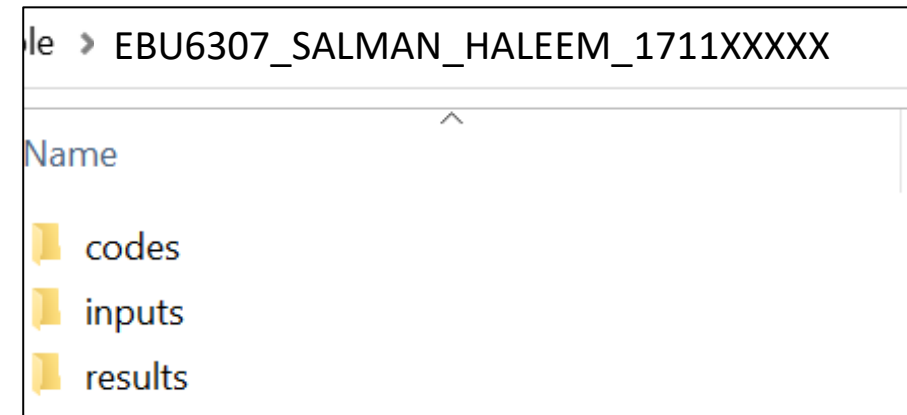

- Name the zip file you submit as:

<EBU6307_FIRSTNAME_FAMILYNAME_QMSTUDNETNUMBER>.zip

- Max size of the zip file: **50M (believe me you can make it!)**

- input folder has to be there however, keep it empty, as you are only allowed limited data submission. TAs will upload the input into your specified folder.

output folder has to be there however, keep it empty, as you are only allowed limited data submission. TAs will use your code to generate output

Guideline (2/3)

```
EBU6307_FIRSTNAME_FAMILYNAME_QMSTUDNETNUMBER
├── inputs
├── results
└── codes
```

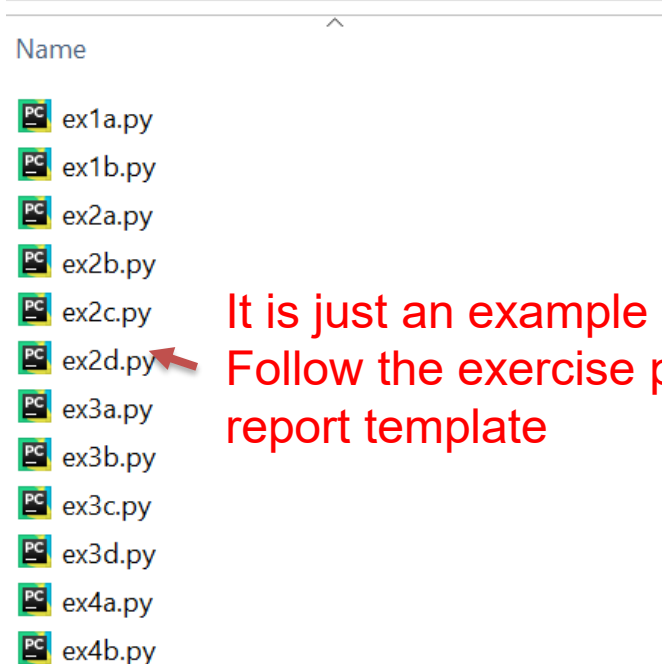

- **\inputs** directory
 - Put all the **input images/videos** you have used to generate the results
- **\results** directory
 - The outputs of your implementations should be generated in the **\results** directory
 - No need to submit the outputs of your code (we will reproduce them!), just make the **\results** directory and leave it blank!. Once your code manage to produce the results as per format, empty the folder
- 1. You will put the Middlebury dataset in the format
 ~/inputs/MiddleburyDataset/data/[all the folders present in data]
- 2. Once you have generated the codes and performed the training/testing, remove the dataset
- 3. You can then upload your coursework on QM+. The TA will first reload the MiddleburyDataset/data/ and then run the code.

Guideline (3/3)

- **\codes** directory

- Remove “_blank” from your file name
 - I.e., make the file names according to exercise parts
- Example is shown below

```
ple > EBU6307_SALMAN_HALEEM_1711XXXXX > codes
```

It is just an example
Follow the exercise parts from your course
report template

EBU6307_FIRSTNAME_FAMILYNAME_QMSTUDNETNUMBER

├ inputs
├ results
└ **codes**

- Your TAs will run your codes in this folder, by simply run the command below, so make sure of your image/video I/O route

```
python ex1a.py  
python ex1b.py  
python ex2a.py  
python ex2b.py  
python ex2c.py  
python ex2d.py  
python ex2e.py  
python ex2f.py  
python ex3a.py  
python ex3b.py  
python ex3c.py  
python ex4.py
```
